The school's community and social responsibility program encourages students at all levels to engage in meaningful service to the community.

**How to create a perfect study environment at home:**

**TOP 8 TIPS FOR SCHOOL STUDENTS**

Creating a good study environment with necessary materials and an organized space boosts productivity. Setting up a specific study area at home enables parents to actively oversee and assist their children in academics. This also contributes to academic success, positive mental health, and the development of effective study habits. The home study environment plays a crucial role in influencing students' well-being and academic performance.

Here are eight tips to help you establish a perfect study environment:  
**Create a designated spot in your home just for studying**

Select a corner or room that is exclusively dedicated to your studies. Make sure it's an isolated space, free from household noise and disruptions, allowing you to fully immerse yourself in your learning endeavors.

**Keep your study space organized**  
Allocate specific areas for textbooks, notebooks, and stationery, utilizing organizers, shelves, or drawers. This method not

only streamlines your study materials but also cultivates a sense of order that fosters a conducive mental space for focused learning.

**Invest in a comfortable chair and desk**  
Prioritize ergonomic comfort by investing in a chair and desk that support proper posture. This ensures that your study sessions remain productive and comfortable, eliminating any physical discomfort that may distract you from your educational pursuits.

**Minimize distractions**

Create a distraction-free zone by muting your phone and silencing unnecessary notifications. Employ specialized apps or features that block distracting websites, reinforcing an environment where your attention is undividedly dedicated to your studies.

**Optimize your lighting setup**

Maximize the benefits of your study environment by positioning your desk near a window to harness natural light. Alternatively, invest in high-quality artificial lighting that is both bright and warm, reducing eye strain and promoting a well-lit, energizing space for effective learning.

**Establish a consistent study schedule**

Develop a regular study routine that conditions your mind to focus during specific times. A consistent schedule not only enhances time

These initiatives reflect the commitment to nurturing well-rounded individuals who excel both on and off the field. TGES-VN endeavours to ensure that every child thrives in every sphere of life, armed with the skills and knowledge to succeed on the world stage.

**RESEARCH METHODOLOGY**

The objective of this research was to arrive at a list of top schools in each zone in Hyderabad. The study had three major modules i.e. Desk Research, Factual survey and Perceptual rating survey.

The geography of entire Hyderabad was divided in 6 zones as follows for the better understanding of school's rank by overall and zone.

- North
- West
- Central
- East
- South
- Northwest

The geographical spread of the sample was ensured by selecting multiple starting points spread across the zone

**STUDY MODULES**

In order to get robust data, the study was completed in the following phases.

**MODULE-1- DESK RESEARCH – GENERATING LIST OF SCHOOLS**

A comprehensive list of schools was generated with the help of internet, magazines and other publications. The various sources used for generation of school list included:

- School following CBSE, IGCSE, IB, etc. curriculum
- List of school from previous surveys.
- A discussion with industry experts to add/ delete any school
- to ensure we have a comprehensive list. In addition, two criteria for short listing were applied.
- Schools that have at least 3 batches as of April 2024

As it is not possible to get a completely exhaustive list of schools and include them in the survey, we had the option of adding any new school name in the survey form if any respondent mentioned any school name outside our list. Effectively, every school had a chance of getting covered in the survey if their name was mentioned by the respondents.

**MODULE 2- FACTUAL SURVEY**

More than 700 schools were sent the factual questionnaire for filling request via emails and then rigorously followed up through telephone. The factual data sheet focuses on the following information areas:

- General information of the School: Establishment, Affiliation etc.
- Infrastructure & facilities
- Sports facilities in the school
- Cultural/extra-curricular facilities in the school

- Medical facilities in the school
- Teachers
- Exchange programs and global exposure
- Awards

**MODULE 3- PERCEPTUAL SURVEY**

More than 1000 perception questionnaire was administered to respondents. Respondents were asked to give rating for only those schools which they were aware of and had included them in their list of top schools in their zone. Respondents were asked to evaluate the schools & rate on a scale of 1-10 where 1 means poor & 10 means excellent. The list of parameters covered in the survey was arrived at based on past surveys as well as discussions with experts from the industry experts and teachers etc. As mentioned, different stakeholders were taken into consideration for the perceptual survey viz. Teachers, Alumni, Students, Parents.

**MODULE 4 & 5- ANALYSIS & FINAL RANKING OF SCHOOL**

Importance weightages were calculated using regression model for each of the parameters leading to analysis of both factual index & perceptual index scores. Further analyses were done to achieve the final score for each of the schools. The overall index score for a school was arrived at by equal weightage to their perceptual and factual score. Based on the performance on the overall index score, final ranking was drawn in respective categories. Schools which did not participate in the factual survey were assigned an average factual score.

**SOME CAVEATS/ASSUMPTIONS:**

- Best efforts were made to reach every school in Hyderabad; however, any school that did not send complete "Fact-Sheet" within the allotted time was not ranked.
- If the GAP between schools is found very low, both schools are awarded same rank.
- Any school which expressly stated that it did not wish to participate in the survey was excluded from the survey
- Schools with very low mention base in perceptual survey were excluded.
- The represented rankings are based on shared information. Avance Insights undertook reasonable measures to get complete and accurate information. However, any lapse or concealment of information or any part thereof that would have impacted results in any way is beyond the control of Avance Insights. Hence, we assume no responsibility towards the said.
